### **Projects Summary (Continued)**

- Project Name: Detecting The presence of disease in paddy leaf using image processing

Language: Computer Graphics

Team Size: 4

Project Guide: Mrs. Soumya M

Description: In the proposed approach, we have captured the images of healthy and diseased leaf. The features of these images are extracted as matrices. The matrices obtained from the healthy leaf and the leaf being tested is compared using Bhattacharya distance method. Therefore, a solution to detect two of the major diseases in paddy crops namely blast, burning blight disease has been presented using Image processing technique.
